2002 – Present

John M. Rynkiewicz is an expert in financial modeling, data analytics, and plays a key role in the successful execution of all GGHM engagements where data analytics and predictive modeling is required. He received his Bachelor Science in Accounting in 1993 from Northeastern University and began his career at the legacy Boston, Massachusetts office of Coopers & Lybrand LLP, John then served as Controller for a privately held multi-state healthcare company until 1997 when he joined Morowitz & Company, CPAs and then Morowitz Gaming Advisors.

John has completed several Masters courses in corporate finance and management science at Rutgers University and in applied statistics at Villanova University. He has also taught numerous courses throughout the United States on various statistical tools and quantitative methods, including regression analysis, simulation and linear programming. During his career, John has worked on a wide variety of gaming and consulting projects including:

- Financial and strategic analysis of a share buyback for publicly traded gaming firm
- Option pricing analysis for consulting entity acquired by a publicly traded firm
- Labor studies and scheduling models for some of the largest casino operations in the world
- Valued minority interest of privately held riverboat gaming investment company
- Financial and market impact studies for various casinos
- Developed models to quantify the impact of new slot legislation in Pennsylvania and Maryland
- Valuation of gaming junket operator
- Analyzed feasibility of new transportation program for large casino
- Developed gravity models and market studies for various tribes contemplating hotel/casino expansion

## **AREAS OF EXPERTISE**

- Corporate finance, management science and applied statistics
- Statistical tools and quantitative methodology including regression analysis, simulation and linear programming
- Developing gravity, financial and optimization models
